

Quantitative Methods for Humanities

Introduction

2026/2027

- ▶ **E-mail:** abel.guada@cunef.edu
- ▶ **Office hours:** Arranged by email.
- ▶ **Software:** R/RStudio may be used for optional enrichment and instructor-led case-study demonstrations. Required assessment does not depend on students writing code.
- ▶ **Evaluation:**
 - Continuous evaluation 40%
 - 10% Quizzes and short checks on course content
 - 10% Midterm exam 1
 - 10% Paper-analysis group project
 - 10% Midterm exam 2
 - Final exam 60%
 - Covers all course content
 - Minimum grade is 5!

- ▶ **Speaking in class:** You can only speak to contribute something to the class or to ask a question. People who disrupt the class will be expelled from the classroom.
- ▶ **Mobile phones:** They must remain in the backpack/bag during the class.
- ▶ **Laptops:** They can be used for taking notes and for practical class activities.
- ▶ **Punctuality:** You cannot enter the classrooms once the class has started.

Why study Quantitative Methods?

Definition of Quantitative Methods

Systematic approach of **collecting and analyzing numerical data** to research.

- ▶ **Tools of QM:** Statistical reasoning, research design, data collection, and, when useful, programming.
- ▶ **Synonyms:** Quantitative research, numerical research, statistical methods, ...

Common Characteristics of Quantitative Methods

- ▶ Use of **measurable data** (e.g., percentages, averages, frequencies).
- ▶ Structured and standardized **data collection methodologies** like surveys or experiments.
- ▶ Focus on **causality** and **relationships** between variables.
- ▶ Deliver **insights** about larger populations out of **representative** samples.

- ▶ **It is the right moment:** Data + Computational revolution
- ▶ **It is the right choice:** Data-driven decision making

“

In God we trust; all others must bring data.

- William Edwards Deming

”
